Orange Slovensko Powers Android TV Offering With Viaccess-Orca

Viaccess-Orca's DRM Solutions Offer State-of-the-Art Content Protection for OTT Streaming and IPTV Delivery

PARIS — Feb. 21, 2022 — Viaccess-Orca (VO), a global leader providing OTT and TV platforms, content protection, and advanced data solutions, announced today that Slovakian operator Orange Slovensko has launched its Android TV offering with VO's DRM solutions. VO's DRM provides Orange Slovensko with state-of-the-art security solutions for content protection and multi-DRM management, simplifying the delivery of OTT streaming and IPTV services on Android TV set-top boxes (STBs).

"Introducing an Android TV offering enriches the television experience for our subscribers. However, it's imperative that the content we're delivering is well protected," said Martin Lednár, Service Platforms and Products Manager at Orange Slovensko. "VO's DRM solutions are embedded in our headend and at the STB level to ensure end-to-end protection. VO's DRM solutions have passed rigorous industry assessments, which gives us the confidence that our content is safe, even as piracy continues to evolve."

VO's DRM includes robust security agents that are integrated with STBs running the Android TV operating system, connecting Orange Slovensko subscribers to premium live and on-demand content. With VO's DRM solutions, Orange Slovensko can ensure the highest content protection. VO's solutions support multiple DRM technologies, including Microsoft PlayReady, Apple FairPlay, Google Widevine, and VO's own in-house DRM technology, streamlining content protection management.

"Orange Slovensko has the prestigious reputation for operating a countrywide network covering 99% of the Slovakian population, and we're excited to take its TV offering to the next level," said Pierre-Alexandre Bidard, Vice President of Partnerships and Security Products Management at Viaccess-Orca. "Our one-stop-shop DRM solutions secure IPTV and OTT services, with deployment options on-premises and in the cloud, making them flexible, scalable, and future-proof."

More information about VO's DRM solutions is available at www.viaccess-orca.com/drm-solutions.
