

VO's Network Personal Video Recording Solution

Reducing costs while ensuring the best viewer experience

Data Sheet

Network Personal Video Recording (NPVR) provides advanced capabilities of recording linear channels in the network, in a multi-device environment with on-the-fly packaging, drastically reducing storage costs.

VO's NPVR functionality allows your subscribers to record their favorite programs or series from any of their devices; the recordings are then stored in the network and not on the Local STB Disk, and can be played on all the subscribers' devices, anywhere, anytime.

Benefits for Operators

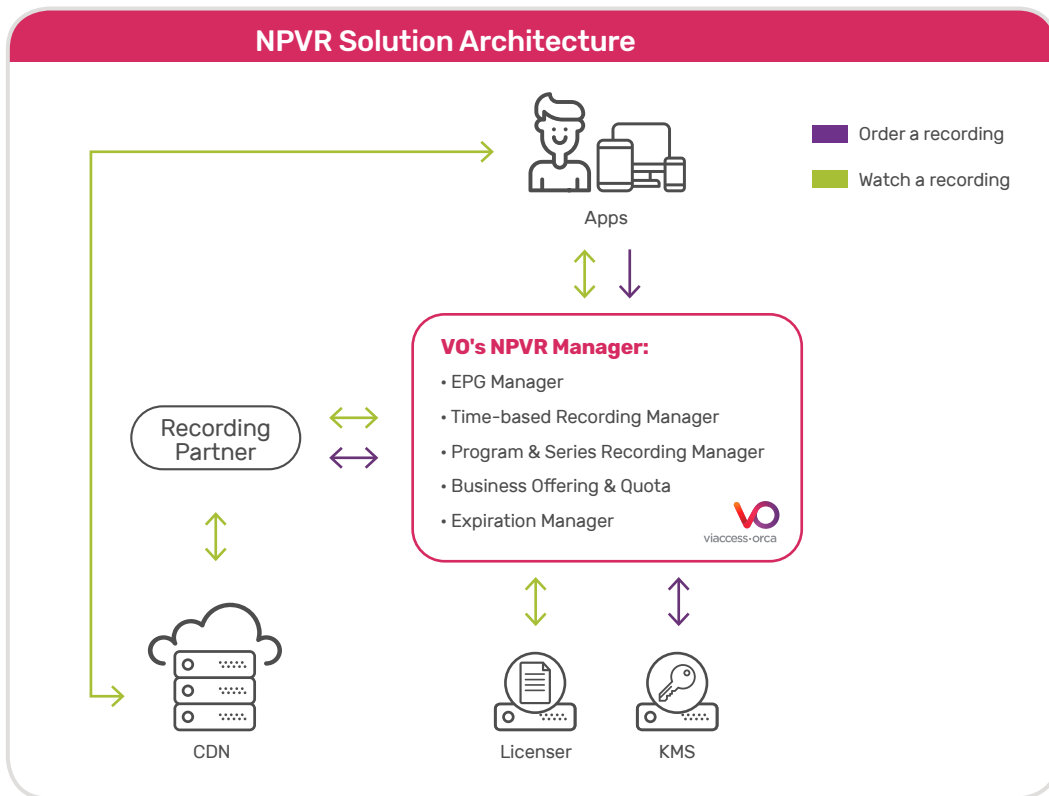

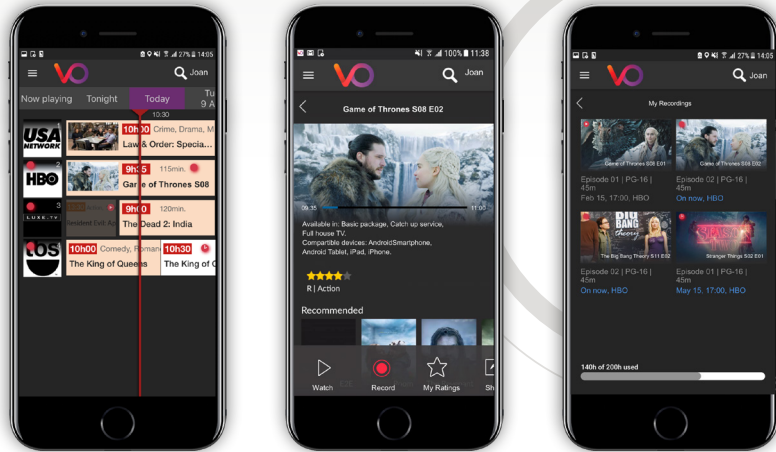

- Optimized storage consumption, using a shared copy method, packaging on-the-fly capabilities and automatic recordings deletion, saving the cost of storage capabilities in the STBs.
- Increased customer satisfaction and churn reduction as subscribers obtain a rich viewing experience.
- Easy to deploy and use, integrated with major recording vendors in the market and compatible with many others.
- Flexible business models that enable the operator to offer multiple options to the subscribers based on recording quota hours, allowed number of concurrent recordings, and price.
- Advanced microservices-based architecture allows improved performance and scalability.
- Pre-integrated with leading industry DRM solutions, including VO DRM.

Benefits for Subscribers

- Order, watch and resume recordings from any device.
- Program based recording that automatically handles EPG changes and records the relevant program even though its time changed.
- Series recordings allowing the subscriber to record a full season even for future episodes.
- Time based recording allowing the subscriber to record a channel regardless of the EPG.
- Personal lead and lag time set per recording by the subscriber, especially useful for sports fans.
- Recording of past programs allowing the subscriber to record on-going programs, or programs that have already been broadcasted.
- Recordings can be restored if a subscriber unsubscribes from the NPVR service or a channel package, and then re-subscribes within a certain time.

It's smarter, it's safer. It's VO.

NPVR in VO Apps

Why VO?

- Proven, scalable, top-quality TV platform
- Global provider to millions of customers and devices
- Proven, experienced team that provides superior professional and managed services
- Large ecosystem of partners and integration plugins

See how easily you can create marvelous TV experiences that leverage NPVR.
