Cloud-Based? On-Prem? As a Service? You Choose

All platform types, any business model
From an added-value product to a complete package of E2E solutions for the cost-effective, agile management of OTT, IPTV, broadcast and satellite platforms.

AI-based TV Advertising
Supporting all advertising formats and models. Perfect for operators and service providers seeking viewer-level addressability and multiscreen service monetization.

Embedded value-added features
Multiview, Watch-Party, Targeted TV Advertising, and QoE metrics, pre-integrated with VO's award-winning, Hollywood studio-compliant Secure Video Player.

E2E integration at scale
Senior-level engineers accompany you every step of the way, from implementation & E2E integration to the successful launch of your operational TV service.

Full-scope, multi-layer protection
VO's content security solutions empower you to comply with the requirements of right holders, studios, and sports leagues.

A seamless content aggregation framework
With unified metadata management and ingest, seamless SSO access, data-driven analytics, and format standardization.

A holistic approach to video piracy
Web, IPTV, STBs or Apps – our award-winning Anti-Piracy Center is designed to counteract all types of video piracy.

Plug & Play managed services
Including Secure Video Player, CAS, DRM, and Anti-Piracy Services, as well as a fully hosted & managed Cloud TV service.
